

Small, Strong, Sustainable

**“We fully understand
SDGs as they become
ever more important all
over the world.”**

—Seido Kanaya
President & CEO,
Kanase Inc.

When it comes to income and ambition, growth is important to Japanese firm Kanase Inc. But not when it comes to size. In fact, a lean, concise working culture is this family business’s unique selling point. It creates a strong sense of efficiency, teamwork and the agility to react to change. Specializing in the production of recycled acrylic sheets means the company plays a key role in driving sustainability across many different sectors.

With more than 100 years in business, the firm is also renowned for using higher percentages of recycled materials. “We are a small company, so our manufacturing team also plays a big part in R&D, which is part of our strength,” said president Seido Kanaya.
